R6 READY

A printer you'll gladly share a room with! The new KYOCERA ECOSYS P2135dn desktop printer has a silent printing option, ensuring that the printer won't interfere with your work. Moreover, its network connectivity and high security standards secure your documents during the whole printing process. It prints up to 35 pages per minute and will easily handle large print runs; its LCD control panel gives you clear messages about the device's status. Robust, highly reliable and very economical, the ECOSYS P2135dn is a printer you can really count on.

KYOCERA
Document Solutions

ECOSYS ECOSYS stands for ECOlogy, ECOnomy and SYStem printing. With their long-life components, ECOSYS devices are designed to maximise durability and minimise the total cost of ownership with regard to maintenance, administration and consumables. The cartridge-free system means that the toner is the only consumable and hardly ever needs to be replaced. The modular design concept allows you to add workflow-enhancing functions as required and the integrated system software provides long-term cross-network compatibility.

KYOCERA NetViewer

KYOCERA NetViewer enables the complete monitoring and control of all ECOSYS printers and digital KYOCERA multifunctionals from any Windows© PC and thus gives you the means to streamline your network administration. It also supports standardised SNMP.

PRESCRIBE IIe

With the KYOCERA page design and control language PRESCRIBE IIe, even complex graphics, logos and forms (multipart forms) can be created independently on the system, and saved and updated in the printer. Consequently, integration into print files no longer applies. They are only accessed as required and therefore relieve the load on the network.

STATUS MONITOR AND COMMAND CENTRE

The status monitor shows the current printer's condition and gives direct access to the command centre for the modification of settings that are not contained in the drivers (e.g. network settings, adjustment of sleep mode or blocking of the control panel).
